As we continue through this public health emergency, it is important that children see their healthcare providers for their well-child visit. These well-child visits are essential for many reasons, including:

- **Tracking growth and development** including milestones, social behaviors, and learning
- **Discussing any concerns** about your child's health
- **Getting scheduled vaccinations** to prevent illnesses like measles and whooping cough (pertussis) and 12 other serious diseases

The United States had more than **1,200 cases of measles** in 2019. This was the **greatest number of cases** reported in the U.S. since 1992 and since measles was declared eliminated in 2000.
